## Water Conservation Commitment

Dear Sirs,

is aware about the increased water risks associated to the climate crisis and acknowledge that more work needs to be done to increase our own operations and our supply chain partner sites' resilience to water risk.

We are committed to collaborating with Brands on Water Conservation to become more water responsible and resilient together.

We commit to provide water usage and production data at facility level to enable the assessment and improvement in our water impact.

Based on our water risk, intensity and assessment performance, we commit to develop and implement proportionate action plans for our own operations and our supply chain partner sites.
